```
accept E(formals) do
  statement list;
end;
```

```
select when B₁ => accept statement; additional statements;
or ...
or     when Bₙ => accept statement; additional statements;
end select;
```

```
select entry call; additional statements;
else   statements;
end select;
```

```
select entry call; additional statements;
or     delay statement; additional statements;
end select;
```

Ada accept and select statements.
