	Node 1	Node 2
initial state	`x = 0, y = 0`	
1.	write **`x`**, no fault	
2.		write **`y`**, page fault
3.		send request to Node 1
4.	send page to Node 2	
5.		receive page
6.		write y, no fault
final state		x = 1, y = 1

Figure 10.16 Page fault handling in a DSM.
